

Onboarding Review

This package is designed specially for all our customers moving their clusters to Instaclustr Apache Cassandra® Managed Services or engaging with Enterprise Support services.

With Instaclustr **Onboarding Review Package** on your side, our consulting team will conduct a detailed review of your Cassandra, Spark, or Kafka usage to uncover latent issues and opportunities for improvement. We will also plan the migration of your application to Instaclustr's managed platform ensuring a zero downtime migration.

Inclusions

At a high level, the package verifies your data model and usage patterns, and provides information on how to improve and fix any issues found. Our Onboarding Review Package includes the following steps, to assist you to you move your applications to Instaclustr Apache Cassandra® Managed Service:

- **Questionnaire:** We provide a questionnaire asking for information about your use of Cassandra, Spark, or Kafka, including data from your current cluster where applicable.
- **Meeting:** Once you have filled out the questionnaire and returned it to us, we schedule an online meeting to review your answers and clarify information where necessary.
- **Data Model Review:** We review your Cassandra or Kafka schema against our data modeling best practices checklist to highlight any issues that can be discovered through static analysis.
- **Report:** We will review the information provided in detail, ask for any necessary clarifications along the way via e-mail or online meeting, and provide a detailed, written report of the outcome of our review. Included in this report is a migration plan to enable a zero downtime move to the Instaclustr Managed Service.
- **Q&A:** An online meeting will be scheduled to review the report and ensure you understand any recommendations or issues highlighted. If necessary, we will release a revised final report following the meeting.

Key Outcomes

- ✓ Assurance that your application is using Cassandra or Kafka efficiently and with optimal availability, and that your usage will be able to scale with your business.
- ✓ Possible reduction in your infrastructure costs and increased application performance and availability. Addressing application-level considerations, as our managed service takes care of the infrastructure often improves the performance of underlying clusters.
- ✓ The smoothest possible, zero-downtime migration process and ongoing stability and performance in the Instacluster environment.
- ✓ Have a complete understanding of the value that Instacluster could add through its Managed Platform.
